

PROGRAMME OUTCOMES OF B.Sc. MATHS

Programme	Objective of Programme (Minimum 4)	Outcomes
B.Sc. (MATHS)	To teach the students about the fundamental concepts of real numbers	After the completion of this programme, students will be capable to contribute to the feilds involving limits,differentiability,Riemann Integration, real numbers,eigen values and vectors.
	To enable the students to understand the concept of sequence, limit, continuity, differentiability, Riemann Integration in detail	
	To teach the students to find eigen values and eigen vectors of a square matrix using the characteristic polynomial	Students can also seek admission in post graduate courses and programmes and later research.
	To teach the students the use of mathematics in computer systems and their applications
