PROGRAMME OUTCOMES OF M.Sc. COMPUTER SCIENCE		
Programme	**Objective of Programme (Minimum 4)**	**Outcomes**
M.Sc. (COMPUTER SCIENCE)	To enable the students to design and develop computer programs using knowledge of algorithms, networking, cloud computing, artificial intelligence, web designing, mobile applications, etc.	After the completion of this programme students would be capable of designing and developing computer programs using the knowledge of algorithms, networking, cloud computing etc. They will also gain knowledge of virtualization technologies, AI research and programming language, operating systems and database administration skills.
	To provide the students with a deep insight about the role of virtualization technologies	
	To enable the students to creatively think and use the ideas of AI research and programming language in various technological fields	
	To teach the students to implement the concepts of Operating Systems and Database Administration Skills
