 Copy

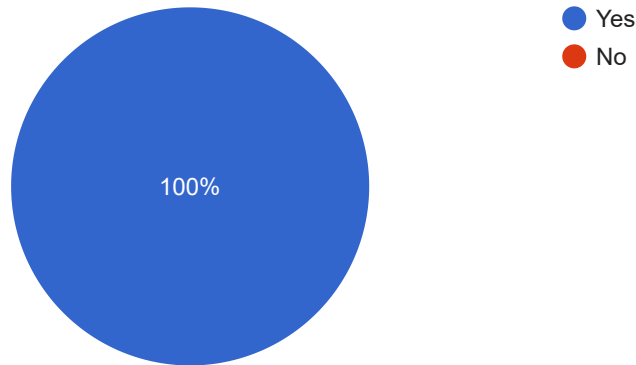

2 responses

Are the Graduates able to learn and adapt to new technologies?

 Copy

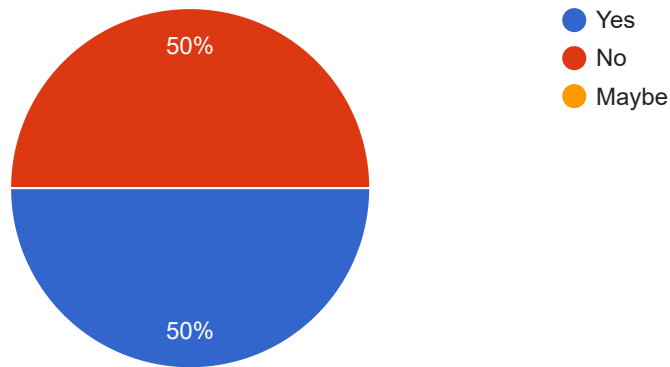

2 responses

Are the Graduates honest, ethical? Do they believe in unity and integrity?

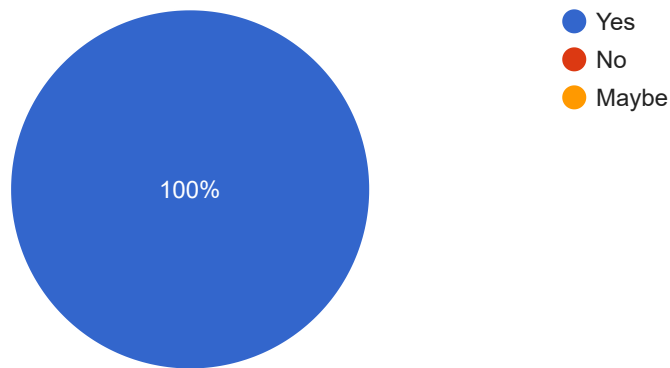

2 responses

Are the Graduates able to handle stressful situations and overcome the problems effectively?

2 responses

What are the strong points of the graduates working in your organization?

2 responses

They learn new technology fast

People who work whole heartedly are able to deliver the work

What are their weaknesses?

2 responses

Agressive

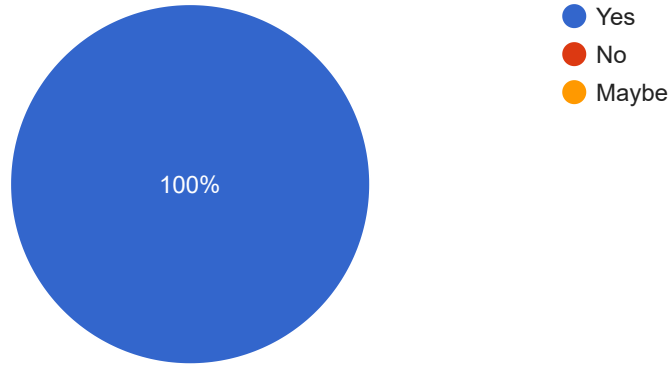

Many of them are not aware of the base foundational programming skills, majorly from IT department students coming I had bad experienced, hired 5-6 and had to ask them to stop as their basic skills were missing and being a startup we can spend time in teaching the basics

Would you like to hire fresh graduates who complete their degrees from the colleges like ours?

2 responses

What do you expect to be included in the syllabi or courses of the college graduates?

2 responses

Btech Engineering Students

Practical examples and more hobby projects to improve your coding skills and it should be enforced & motivated for individuals to code rather 90% of IT batch student end up buying projects rather learning how to code

Suggest what can our college do so that the students enhance their skills and become employable?

2 responses

Give training regarding industrial sectors

Involve alumnis in Project Guidance, they should be exploring more in creating hobby projects
