Overall the performance was good, but the professor should pay more attention towards students and should clarify the doubt very kindly... Some students hesitate to ask the doubt but the prof. should encourage them and should be more kind towards student

Practical knowledge

No need

-

Noo

No suggestions

Yes

Personality development

No comments

NA

I think everything is ok

I think the overall syllabus is good... no change should be required

Fiance should be include in the syllabi

I think we should get only that much of the thing that a student can learn no more extra things if that will be of no use in future syllabi should be interesting to study

No it's better

Recombinant DNA Technology experiments should be such that during experiment student should be thought practically how to makea GMO and recovering desired product from it.

More languages and updating the syllabus is requested

.....

A less theory

Reduce the syllabus

More examples on the particular topic

More practical

Syllabus busy be upgraded to industry grade so to make student industry compatible, internship opportunities must be provided to every student so to get practical experience of industry trend

Relevant To The Current Trend Our Syllabus Mostly focuses on Useless Theory Instead of Actual Practical

It help to be positive thinking

It should include more practically and trendy part

It's perfect

Teacher should teach us how to do project properly with the help of demo projects

There should be effective presentation taken in class

No idea

Better syllabus

Syllables is Old make a new syllables every 2 year that in syllables include current scenario of what happening in company how it's all work teach that to the student practically instead of

more Old theory

I personally want some improvement in the syllabus by including various subjects like Audit , Taxation, finance in the syllabus that could be more useful nowadays in the corporate world to even enter the job market, interesting to learn & useful. Highly recommend you to please involve activities for students like other colleges such as student presentations, finance clubs, marketing clubs, quiz competition, e-cell activities which have to made compulsory for students this would definitely help them improve that skills. And please make that teachers not just do route teaching instead make class interesting by teaching them through presentation & many more activities which even involves students specially for Bcom students.

In syllabi new and understanding concepts should be brought in.

No elements required

Being in IT Era, syllabus must include chapters containing modern world technologies, methods and practical things that will help students to tackle real life challenges out of books as well

All good

Better Do Practical Than Theory, Practical Teaching Should Be Done To Understand Concepts More Clearly

Proper Certified Textbooks

--

More information about the syllabus and informative examples

More knowledge lesson include

More background informations

I don't want anything that includes in syllabi

Improve the account subject teaching method

I think everything is going quite well maner according to me there no necessary changes

Training & development activities need to include in syllabi.

Study on the humans as well

More with example's

Placement, internship

Personal Development

Human behaviour

Everything is fine

I think real time development should start from 4 sem onward because ,it not just enough in other technical courses for whatever duration atleast two years or from beginning they get started

Ongoing language should be taught like mern stack, futter etc

Every thing is perfect

The skill set that will make coding or programming language much more easier to understand the logic and all that stuff and so that the students can connect more and they will find interest in that.

More trending technology subjects will help alot

I have no idea

There should be the real making of certain project in lab itself and all student should get chance to showcase their skill Teacher doesn't know the name of whole class

Practicals

I think the syllabus should include the practical things that we faces to get a job and also to maintain a perfect career in our own choice

The syllabus should content depth knowledge of a particular subject... because changing subjects every semester does not make that language strong for the computer science students

The syllabi does not need to have any changes

C sharp

There should be Personality development subjects, sports

We should include new programming languages other that the old one because in IT Industry every day the new technologies being developed so it will help my juniors to get good jobs if they will have more knowledge of new technologies

As there are many students those are non cs in 12th so there must be all the topics from scratch

Syllabus needs to be updated thoroughly. The current business strategies needs to focus on

More Practical Knowledge

Advance use of coding applications,for eg rather than using basic notepad for coding html,java.....use better advanced applications during practicals

I think in the syllabus there should be more of previous knowledge also so that student won't forget and the teacher should explain that topic wheather its new or old!

Personality development and not just theory based bcoz it won't help us at all

No one

Personality development and learning life lessons

Nothing everything's great.

It should include more about current professional business environment in detail

Include supplementary material to help students succeed in the course

There are many field visit to get the practical knowledge of a particular concept .Teachers should plan some trips for the students accordingly.practical should be made for the students to be done individual and not in a group so that each and every child gets the opportunity and can learn and get practical knowledge of their subject

Some other topics which will also help us in competition exam preparation.

We need nice teacher in fycs.we want nice professor

Whatever topic is in the syllabus should be in full details

Explanation in easy way

Some more solved examples

More Practical knowledge

Improve our over all personality.

More visuals.

Syllabus should be up-to-date and practical oriented

Examples in form of pictures need to be inculcated
